

Mohamed Elsayed

Data Analyst · AI-Augmented Automation Specialist

📍 Cairo, Egypt | 📞 +20 100 054 6767 | ✉️ [Email](#) | 🔗 [LinkedIn](#) | 💻 [GitHub](#) | 🌐 [Portfolio](#)

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on experience in data collection, cleaning, analysis, and visualization. Proficient in Excel, Python, SQL, and Power BI, with demonstrated ability to leverage AI tools to accelerate automation, build custom web-based data-entry solutions, and enhance analytical workflows. Skilled at translating complex datasets into actionable insights and eager to apply both analytical and AI-augmented capabilities in a full-time data analyst role.

EXPERIENCE

Intern Data Analyst | Egyptian Red Crescent

Cairo, Egypt · Jan 2024 – Present

- ▶ Designed M&E frameworks using Excel and Power BI; built dashboards to communicate project performance indicators to stakeholders.
- ▶ Conducted field visits and leveraged survey data to assess project impact and inform strategic decisions.
- ▶ Utilized AI tools (ChatGPT / Claude) to accelerate data-cleaning workflows and generate automated summary narratives for reports.
- ▶ Collaborated with cross-functional teams to improve data accuracy and streamline reporting cycles.

Coding Intern – IoT & Data Visualization | EGSA

Cairo, Egypt · Jul 2022 – Sep 2022

- ▶ Built a real-time monitoring system using sensors for temperature/humidity collection and smoking detection.
- ▶ Designed a web interface to receive and visualize environmental data using time-series charts.
- ▶ Applied Python for automation and data-logging processes.

FREELANCE EXPERIENCE

Freelance Data Analyst | Remote · Various Clients

Remote · 2023 – Present

- ▶ Conducted exploratory data analysis (EDA) for clients across multiple industries using Python and SQL.
- ▶ Designed interactive Power BI and Excel dashboards to visualize trends and KPIs.
- ▶ Assisted small businesses with data-cleaning, integration, and reporting automation to enhance operational efficiency.
- ▶ Used AI tools to generate Google Apps Script code for automating Google Sheets workflows — reducing manual data-entry time by ~60%.
- ▶ Built customized web application forms (HTML/CSS/JS + Google Apps Script) to replace paper-based data capture for clients, with data feeding directly into structured Google Sheets.
- ▶ Applied AI-assisted Python scripting to enhance data-cleaning pipelines — automating deduplication, format normalization, and outlier flagging across large datasets.
- ▶ Delivered advanced sales and supply chain analytics: identified demand patterns, inventory inefficiencies, and supplier performance gaps using Python (Pandas) and Power BI.

KEY PROJECTS

AI-Powered Google Sheets Automation Suite

- ▶ Wrote Google Apps Scripts (aided by AI code generation) to automate data ingestion, conditional formatting triggers, and scheduled email alerts directly from Google Sheets.
- ▶ Reduced recurring manual reporting tasks for a client from ~4 hours/week to under 20 minutes via fully automated pipelines.

Custom Web Application Data-Entry Forms

- ▶ Designed and deployed responsive web forms (HTML/CSS/JS) with Google Apps Script backends, enabling real-time data submission directly into structured Google Sheets databases.
- ▶ Used AI tools to generate, debug, and optimize backend script logic, cutting development time significantly.

Enhanced Data-Cleaning Pipeline (Python)

- Built an AI-assisted Python pipeline for automated detection and resolution of duplicates, missing values, inconsistent formats, and outliers across multi-source datasets.
- Packaged as a desktop application (Tkinter) to allow non-technical users to run cleaning processes via a simple GUI.

Advanced Sales & Supply Chain Analytics Dashboard

- Developed end-to-end analytics solutions integrating SQL for data extraction and transformation, and Power BI for interactive dashboarding and visualization.
- Performed sales trend analysis, demand forecasting, inventory turnover tracking, and supplier lead-time evaluation using Python (Pandas, Matplotlib).
- Identified supply chain bottlenecks and seasonality patterns, delivering data-driven insights that improved stock planning accuracy.

Smart Desktop Timer & Automation Tool

- Designed and implemented a GUI-driven desktop application using Python and Tkinter that provides timer-based automation for system operations and media control, featuring customizable scheduling, background execution, and enhanced user interaction.

EDUCATION

B.Sc. in Physics and Space · Helwan University, Cairo, Egypt · Sep 2018 – Sep 2024

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera
- Google IT Automation with Python – Coursera
- KPMG AU Data Analytics Consulting Virtual Internship
- PwC Switzerland Power BI Job Simulation
- Accenture North America Data Analytics & Visualization Virtual Experience

TECHNICAL SKILLS

Programming	Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, R (basic), Web Scraping
AI & Automation	AI-assisted scripting (ChatGPT / Claude), Google Apps Script, Selenium, gspread, Automated pipelines
Web & Apps	HTML / CSS / JavaScript, Google Apps Script backends, Tkinter desktop apps, Custom web forms
Visualization	Power BI, Excel (Pivot Tables, Advanced Formulas), Google Sheets API, Matplotlib / Seaborn
Data Handling	Data Cleaning, Transformation, EDA, Dashboarding, Supply Chain & Sales Analytics

LANGUAGES

Arabic (Native) English (Advanced)
